The Good Governance Initiative (GGI)

The GGI Handbook

- A Framework to create a full blown OSPO
 - Lists 25 **Activities**, from Software Composition Analysis and development best practices, to training, HR and executives' education.
 - Activities are organized into **Goals**, from discovery to engagement and strategy.
 - **Scorecards**, to describe and assess how each activity is implemented in a company. Allows to adapt GGI to your context i.e. **My GGI Board**

The Resource Center

- Collect existing relevant material to address all open source challenges

OSPO Alliance & OnRamp Meetings

- A space to share and promote OSPOs, and good implementation of the GGI.

The OSPO Alliance

- Launched in 2021 by **European nonprofit organizations** to promote an approach to **excellence in open source software management**.
- **Governed by open source principles:** open, collaborative, meritocratic. Everybody is welcome, and we respect members privacy (no collection of details, no spamming).
- Provides:
 - The OSPO Alliance website and community mailing list.
 - The OSPO OnRamp monthly webinars.
 - The Good Governance Initiative and its associated resources.
- Yearly releases: v1.0 (Nov 2021), v1.1 (Nov 2022)

GGI v1.1 - Deployment

- Easy to deploy: 10mn setup on any GitLab instance.
- Provides complete access to all GGI features: activities, boards, and a customized dashboard to track and share progress.

The screenshot displays the GGI dashboard interface. On the left is a sidebar menu with categories: Repository, Issues (25), Boards, Service Desk, Milestones, Merge requests (0), CI/CD, Security & Compliance, Deployments, Packages and registries, Infrastructure, Monitor, and Analytics. The main content area shows a grid of goal cards. The 'Usage Goal' card includes 'Inventory of open source skills and resources' (with Developer, In Progress, and Team Leader tags), 'Open source competency growth' (with Not Started and Team Leader tags), and 'Open source supervision' (with Not Started and Team Leader tags). The 'Trust Goal' card includes 'Manage legal compliance' (with Decision Maker and Not Started tags), 'Manage software vulnerabilities' (with Not Started and Team Leader tags), and 'Manage software dependencies' (with Developer, Not Started, and Team Leader tags).

General progress

Activities:

- 24 activities **not_started**
- 1 activities **in_progress**
- 0 activities **done**

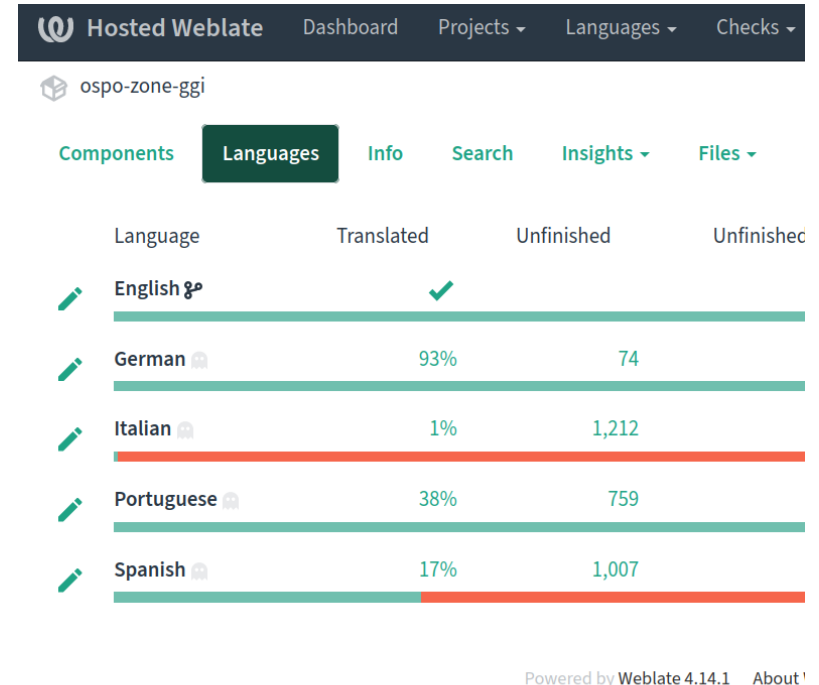

Goals

GGI v1.1 - Translations

Translations of the Handbook are available!

- We are using Weblate (an OSS project) to crowdsource the translations.
- **German and French versions already available**, with others on their way: Portuguese, Spanish, Italian.
- And more to come!

GGI Features & Roadmap

The GGI Handbook has received an enthusiastic reception.

- It has **already been deployed** at various organizations (corps, administrations).
- **Feedback is great.** We want to continue improving its content and dissemination.

Possible next steps for the roadmap:

- Improving and enriching the handbook with more, and better content.
- More translations, Better deployment on multiple platforms.
- Integration of metrics to better track progress and success!
